Garment Care

Garment care

- Always refer to the care label on the inside of each garment for specific instructions
- Hang garments on appropriate hangers

Ironing

- Iron wool-rich garments inside out to avoid unwanted shine
- Synthetic fabrics should be ironed on low temperatures
- Use of a pressing cloth will help to avoid fabric shining, particularly for wool and polyester garments

Machine washing

- Do not let garment get too dirty before washing
- Empty the pockets, unfasten the buttons and lift the collar of shirts before washing
- All garments are washed using cold water unless otherwise stated on the garment care label
- Separate whites from coloured garments

Dry cleaning

- Scarves should be dry cleaned only

Stains

- Pre-wash spray is recommended for stain removal

Shirts

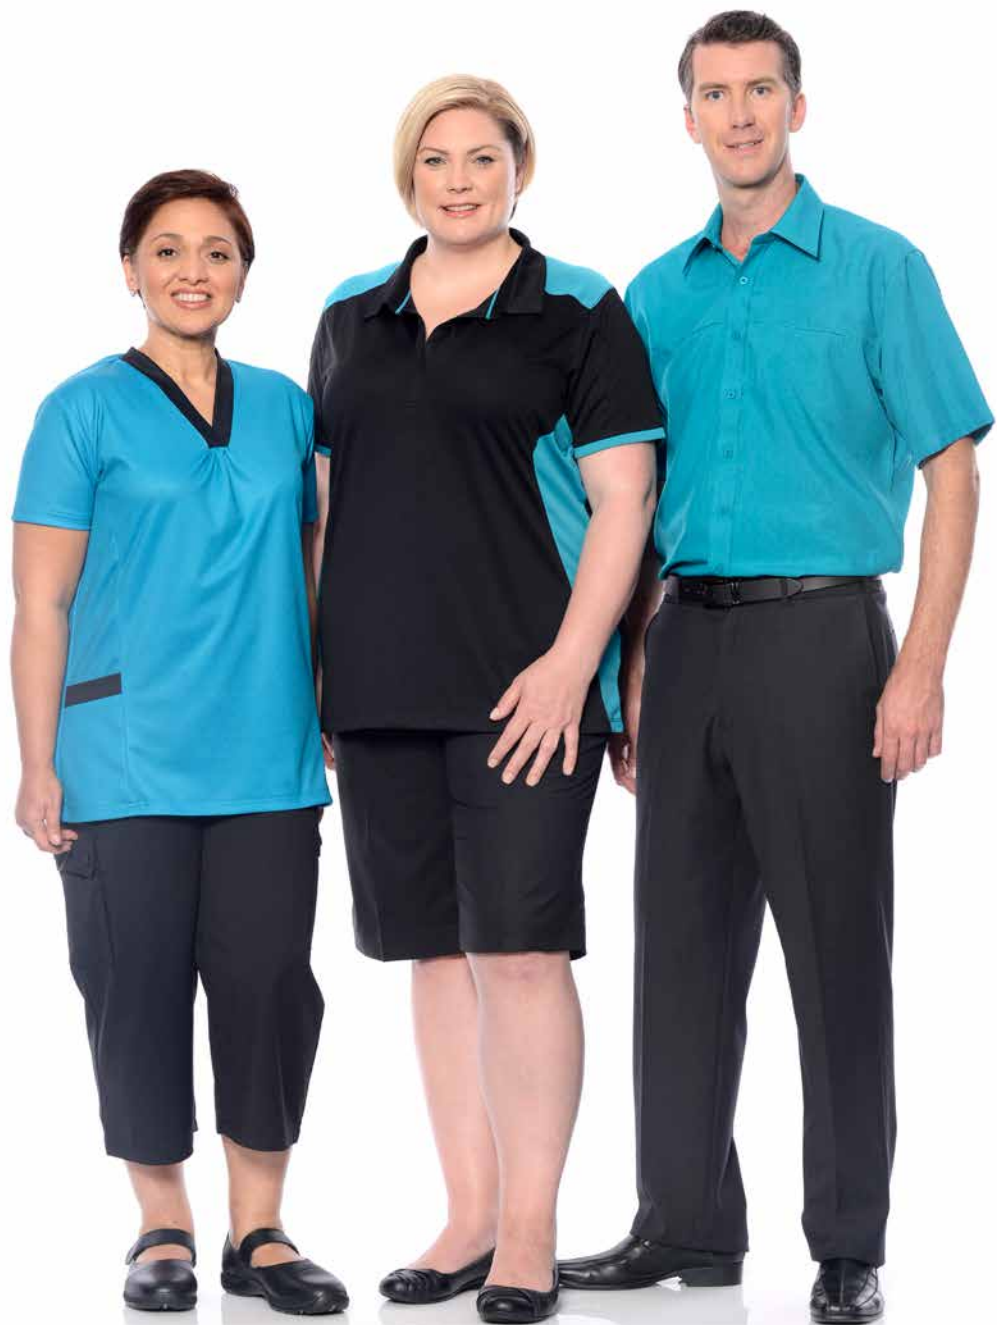

- Always iron the collar away from the point. This prevents creasing on the collar
- High alkaline anti-perspirants should be avoided to reduce permanent stains appearing under arms

Trousers and skirts

- Hang your trousers full length from the bottom. This will help creases to drop out and prevent hanger marks
- If you need to re-crease your pants press one leg at a time
- Place a clean tea-towel or cloth over the trousers/skirt. Spray lightly with water and then iron
- Steam your trousers/skirts in the bathroom
- Let your trousers/skirts hang out of the wardrobe overnight to air after wearing
- Never hang in direct sunlight

Knitwear

- To dry, lie your knitwear flat on a natural-fibre towel, away from direct sunlight
- Store your knitwear only after it is completely dry
- Do not spin or tumble dry knitwear
- Always fold and store flat
- Remove pilling, loose fibres with a de-pilling comb

Measurement Guidelines

Here are some tips for measuring.

Using the correct measuring method will help you to make informed choices for your wardrobe selection.

It is important to measure yourself in the correct places as this will impact how well your wardrobe items fit.

Use a tape measure, keeping the tape taut but not stretched, ask a family member or friend to help you if necessary.

Record your measurements in centimetres.

Women

- **Waist** – measure where your skirt or pant waistband usually sits, while holding two fingers between your body and the tape. Keep in mind that items are designed to be fastened at the waist, not the hips or above the waist. This reflects a classic fit.
- **Bust** – measure under your arms and around the fullest part of your chest, across the bust line. Hold two fingers between the body and the tape.
- **Hips** – measure around the fullest part of your hips (about 20 to 24cms down from the waist) while standing naturally. Hold two fingers between the body and the tape.

Men

- **Neck** – measure around the middle of your neck at collar level, keeping the tape loose to make allowance for comfort.
- **Chest** – measure under your arms and around the fullest part of your chest. Hold two fingers between the body and the tape.
- **Waist** – measure over your shirt at the position your trousers would normally sit. Hold two fingers between the body and the tape.

Once you have your individual measurements, refer to the sizing chart for each garment to find the correct sizes for you.
